EXECUTIVE SUMMARY

I'm an software developer with hands-on experience in web development, robotic process automation, API integration, PHP development, database operations, automated processing of spreadsheet data.

These experiences were complemented by a continuous learning process through the Technical University of Cluj-Napoca, the Informal School of IT, and platforms such as Udemy, The Odin Project, freeCodeCamp, Harvard CS50, and MDN Web Docs.

I'm a solution-oriented person who thrives in fast-paced environments. I'm organized, resilient under pressure, and motivated by the challenge of solving complex problems. I adapt quickly to new technologies and workflows, and I enjoy collaborating in dynamic teams.

I recently completed a Master's degree in Computer Science at the Technical University of Cluj-Napoca and am currently working on improving my German while continuing to advance my English proficiency.

I'm currently seeking roles in front-end, back-end, full-stack, or RPA development, as well as opportunities in software testing, ideally in environments that foster continuous learning, mentorship, and professional growth.

HARD SKILLS

Front-End Development:
HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React; responsive & adaptive design

Back-End Development:
PHP (Symfony, Drupal), Java (Spring Boot), Node.js, Python, C, C++, C#, RESTful APIs, Redis

Databases:
MySQL, PostgreSQL, MongoDB; ORM: Doctrine

DevOps & Tools:
Git (GitHub, GitLab, TortoiseGit), Docker, Jenkins, Cloudflare, Postman, Linux (CLI, Bash), VS Code, IntelliJ, Visual Studio, Virtualization (VirtualBox)

Testing & Debugging:
PHPUnit, JUnit, Symfony Profiler; unit, functional & mock testing

RPA & Automation:
Automation Anywhere, PowerApps; Microsoft 365 and external API integration

AI & Productivity Tools:
ChatGPT, Google Gemini, GitHub Copilot, Cursor, Antigravity.

Project Management & Collaboration:
Jira, Trello, Asana, Slack, Figma; Microsoft 365 Suite, Adobe Photoshop

WORK EXPERIENCE

PHP Software Developer ***01/2026 – Current***
Authentic Spirit Romania

I worked as a PHP Software Developer, where I gained hands-on experience in software development using PHP, working with the Drupal framework, automated data processing from Excel files, database operations, and refactoring front-end pages. During development, I also used tools such as Cursor, Antigravity, and ChatGPT.

Junior Software Developer ***12/2023 – 08/2025***
Digital Distribution Group

As a Junior Software Developer at Digital Distribution Group, I was involved in web development, process automation, and API integration, contributing to the development and improvement of internal tools and applications while collaborating within a dynamic team; I developed responsive web pages using modern technologies (HTML5, CSS3, SCSS, JavaScript/TypeScript, React), integrated APIs, implemented new features, automated database and framework processes, worked on production servers, managed PostgreSQL and MongoDB databases, and utilized PHP (Symfony) along with tools like Git, Jenkins, and Cloudflare, gaining strong experience in both front-end and back-end development within a production environment.

RPA Developer Intern ***07/2023 – 09/2023***
Automatify

During my internship as an RPA Developer Intern at Automatify, I focused on Robotic Process Automation, developing and optimizing automation workflows to streamline repetitive business processes and improve operational efficiency; I designed and implemented RPA bots for rule-based tasks, added exception handling mechanisms, automated data extraction, analysis, and reporting.

EDUCATIONAL BACKGROUND

Technical University of Cluj-Napoca ***10/2023 – 07/2025***
Master's Degree in Computer Science Complements (CSC)

During my Master's program, I developed advanced knowledge and practical skills across key areas of computer science, including programming (C++, C, Java, C#, PHP, Python, OOP), backend development with Spring Boot, and database management using MySQL and PostgreSQL; I also strengthened my understanding of algorithms, computer architecture, operating systems, networking, and distributed systems, while applying software design principles, statistical methods, and virtualization tools like VirtualBox, enhancing my ability to build scalable, efficient, and robust software systems.

Front-End Web Development ***01/2022 – 05/2022***
Informal School of IT – Cluj-Napoca

Completed an intensive training program focused on advanced HTML, CSS, and JavaScript, along with modern frameworks like React and Tailwind CSS, gaining hands-on experience with Git and GitHub, building Single Page Applications (SPA), and implementing responsive and adaptive design principles to deliver optimal user experiences across devices.
